PROFESSIONAL SUMMARY

Software Engineer with 1.8 years of professional experience building high-throughput backend services, distributed microservices, and production-ready APIs using Java 17 and Python. Strong theoretical and practical foundation in Data Structures & Algorithms (DSA), low-latency system design, and database performance tuning. Proven track record of owning software from design through deployment, maintaining high test coverage, and resolving production-level operational issues. Customer-obsessed engineer focused on clean code and reliable scale.

TECHNICAL SKILLS

- **Languages:** Java (17+), Python, SQL (PostgreSQL/MySQL)
- **Backend & Distributed Systems:** Spring Boot 3, RESTful APIs, Microservices Architecture, Concurrency, Multithreading
- **Databases & Messaging:** PostgreSQL, MySQL, Couchbase, Redis Caching, IBM MQ, WMQ, SFTP, Schema Indexing & Optimization
- **Cloud, DevOps & Tooling:** AWS (EC2, S3), Docker, Azure DevOps, CI/CD Pipelines, Git, Maven, JUnit 5, Mockito, Grafana
- **CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Design (OOD), Operational Excellence, Clean Code

PROFESSIONAL EXPERIENCE

Software Engineer **Oct 2024 – Jul 2026**
Cognizant Technology Solutions *Chennai, India*

- Engineered modular backend components and production-ready RESTful APIs in Java, leveraging multithreading, concurrent execution models, and Object-Oriented design principles.
- Managed the full software lifecycle of scalable features—from system design and data modeling to deployment, monitoring, and operational support.
- Executed low-level query performance tuning, index optimization, and data consistency verification across PostgreSQL and Couchbase databases, reducing access latency by 30%.
- Monitored production telemetry, analyzed application logs via Grafana, and troubleshot complex software defects to ensure high system availability and operational excellence.
- Maintained rigorous code quality through automated unit/integration test suites (JUnit/Mockito) and managed seamless CI/CD container deployment workflows.

KEY PROJECTS

High-Scale Distributed Transaction Engine | *Java 17, Spring Boot 3, PostgreSQL, Redis, Kafka, Docker, AWS*

- Architected a scalable RESTful microservice backend using Spring Boot 3 Controller-Service-Repository architecture, implementing advanced JPA Specifications for dynamic filtering and pagination.
- Configured distributed Redis cache-aside caching and rate limiting (100 req/min per IP) to sustain high-concurrency traffic with sub-20ms response times.
- Containerized the full service stack using Docker Compose and deployed it on AWS EC2, complete with comprehensive JUnit 5 and WebMvcTest coverage.

Enterprise Resource & Workforce Platform | *Java, Spring Boot, React.js, PostgreSQL*

- Constructed a scalable full-stack application pairing a React.js interface with a RESTful Spring Boot backend, implementing RBAC.

GenAI Test Automation & Framework Utility | *Python, Gemini API, REST APIs, Docker, Linux*

- Architected a CLI test automation tool integrating LLM APIs to convert technical design specifications into structured integration test cases, cutting manual QA overhead by 50%.

EDUCATION

Sree Vidyanikethan Engineering College **Mar 2020 – Jun 2024**
Bachelor of Technology in Computer Science And Engineering (CGPA: 9.14/10.0) *Tirupati, Andhra Pradesh*

CERTIFICATIONS ACHIEVEMENTS

- **Q4 Top Performer Award (Ford Project)** – Awarded for excellence in enterprise backend microservice delivery and data platform optimization (2025)
- **Algorithmic Mastery:** Solved 150+ LeetCode problems spanning arrays, strings, dynamic programming, trees, and graph algorithms.
- **AWS Cloud Architecture Virtual Internship** – AICTE credential covering fundamental cloud infrastructure design (2023)
- **TalentNext Student Engagement Training** – Wipro technical training in Core Java and object-oriented programming (2023)
