PROFESSIONAL SUMMARY

Associate Software Engineer with nearly **2 year of experience** at **Cognizant**, working on **Java-based automation** and **large-scale enterprise systems**. Strong foundation in **core programming concepts**, **OOP**, **SQL**, and **SDLC**. Hands-on experience collaborating with cross-functional teams, validating **REST APIs**, and improving code quality in **Agile environments**. Actively transitioning into development-focused roles with growing expertise in **JavaScript** and **frontend technologies**.

TECHNICAL SKILLS

Programming Languages: Java (Strong), JavaScript (Foundational)

Backend: Spring Boot (Fundamentals), Swagger

Frontend: HTML5, CSS3, React.js

Databases: SQL (Joins, Subqueries, Indexes)

Testing & Quality: Selenium WebDriver, TestNG, Automation Frameworks

Tools: Git, GitHub, Gradle, IntelliJ, VS Code, Rally, JFrog, Postman, Jmeter

WORK EXPERIENCE

Cognizant Technology Solutions, Chennai

Oct 2024 – Present

Programmer Analyst

Client: Ford Motor Company (Client Location)

Mar 2025 – Jan 2026

Project: Mo-ISIS SV2 Migration

- Contributed to a large-scale enterprise migration project focused on validating system stability, feature parity, and data consistency during the SV2 platform transition.
- Worked extensively with **Java-based automation code**, applying OOP principles to build reusable and maintainable components.
- Implemented **data-driven testing** to validate multiple business scenarios using configurable test inputs.

Client: UPS (United Parcel Service)

Jan 2026 – Present

Project: Address Analytics Application

- Working on a data-driven enterprise application, analyzing and validating end-to-end address analytics workflows across backend services, REST APIs, messaging components, and databases.
- Developing and maintaining Java-based automation and BDD workflows using Selenium and Cucumber to validate business logic, data transformations, and overall system behavior.

PROJECT EXPERIENCE

React Product Dashboard

- Developed a React application using functional components and Hooks to fetch, filter, and display product data from a public API.
- Built reusable UI components with search functionality and responsive, mobile-friendly design.
- **Tools & Technologies:** React, JavaScript, HTML, CSS, REST API integration

EDUCATION

B.Tech in Computer Science and Engineering

CGPA: 9.14

Sree Vidhyanikethan Engineering College, Tirupati

CERTIFICATIONS & ACHIEVEMENTS

- Java Selenium – Automation Framework; Java Spring Boot – Fundamentals; React – The Complete Guide; Master Git & GitHub
- Secured **100% score** in internal coding assessment at Cognizant; Awarded **Top Performer** (Ford Project); Promoted to Programmer Analyst in 12 months
